

## REFERENCES

### BOOKS

#### *General coverage*

David Crystal: The Cambridge Encyclopedia of Language  
(2nd Edition: Cambridge University Press 1997)

#### *The story of English, from beginnings as a minor gutteral Germanic dialect to today's global language*

Melvyn Bragg: The Adventure of English (Hodder & Stoughton 2003)

#### *Survey of early Germanic languages*

Orrin W. Robinson: Old English and Its Closest Relatives (Stanford University Press 1992)

#### *History of the evolution of western languages*

Philippe Wolff: Western Languages AD 100-1500 (Orion Books Ltd. 2004)  
Victor Stevenson: The World of Words (Sterling Publishing Co. Inc. 1999)

#### *Recent contributions of genetics to understanding the origins of the Celts*

Jean Manco: Blood of the Celts (Thames & Hudson Ltd. 2015)

#### *Does there exist an original mother tongue?*

Merrit Ruhlen: The Origin of Language (John Wiley & Sons, Inc. 1994)

#### *Forces of creation and destruction creating constant changes in languages*

Guy Deutscher: The Unfolding of Languages (Picador 2005)

#### *Processes governing the evolution of languages*

John McWhorter: The Power of Babel (Harper Collins 2001)

PUBLISHED ARTICLES (available online)

*Structural analogies between linguistic and genetic geographical patterns of evolution*

A Piazza & L Cavalli-Sforza: Diffusion of genes and languages in human evolution (Proceedings of the 6th International Conference on the Evolution of Language 2006, pp. 255-266)

*Computational methods from evolutionary biology applied to the question of the origin of the Indo-European languages*

RD Gray & QD Atkinson: Language-tree divergence times support the Anatolian theory of Indo-European origin (Nature 426: 435-439, 2003)

*Estimating dates at which languages have diverged*

L Nakhleh, DA Ringe, T Warnow: Perfect phylogenetic networks: a new methodology for reconstructing the evolutionary history of natural languages (Language 81(2): 382-420, 2005)

*Archaeological and linguistic evidence in support of a Pontic-Caspian origin of Indo-European languages about 4000 BC*

DW Anthony & D Ringe: The Indo-European Homeland from Linguistic and Archaeological Perspectives (Annual Review of Linguistics 1: 199-219, 2015)

*Ancestry constraints permit more accurate inference of rates of language change, based on observed changes between ancient or medieval languages and their modern descendants*

W Chang, C Cathcart, D Hall, & A Garrett: Ancestry-constrained phylogenetic analysis supports the Indo-European steppe hypothesis (Language 91(1): 194-242, 2015)

*Genome-wide data from 69 Europeans who lived between 8000-3000 years ago indicate 3 major migrations. (1) 8000-7000 years ago: early farmers (Germany, Hungary, and Spain), (2) 6000-5000 years ago: a resurgence of hunter-gatherers in much of Europe, but in Russia Yamnaya steppe-herders, and (3) 4500 years ago: a massive migration into the heartland of Europe from its eastern periphery, supporting the steppe origin for Indo-European languages*

W Haak, I Lazaridis, et al.: Massive migration from the steppe is a source for Indo-European languages in Europe (Nature 552: 207-211, 2015)
